

Montana Operations Manual

Standard

Policy Number	1240.XS2
Effective Date	July 1, 2012
Last Revised	August 16, 2011

Issuing Authority

State of Montana Chief Information Officer

Information Security Identification and Authentication

I. Purpose

This Information Security Identification and Authentication Standard establishes the specifications and process requirements to implement the identification and authentication security controls specified within the National Institute of Standards and Technology Special Publication 800-53 (NIST SP800-53) Recommended Security Controls for Federal Information Systems and Organizations (NIST SP800-53). Implementation of these NIST controls is required by the Statewide Standard: Information Security Programs.

II. Scope

This standard applies to all executive branch Agencies, excluding the university system.

III. Statement of Standard

The requirements and specifications for this Standard are derived from the National Institute of Standards and Technology Special Publication 800-53 (NIST SP800-53) Recommended Security Controls for Federal Information Systems and Organizations (NIST SP800-53), Federal Information Processing Standard publications (FIPS PUB), and other NIST publications as specifically referenced herein.

A. Management Requirements

Each Agency shall ensure that an organization structure is in place to:

- 1. assign information security responsibilities;
- 2. perform Identification and Authentication for Information Systems;
- **3.** allocate adequate resources to implement Identification and Authentication controls;

- **4.** develop processes and procedures to measure compliance with this Standard; and
- **5.** establish and evaluate performance measures to assess implementation of this Standard and subordinate procedures.
 - a. Department Heads The department head (or equivalent officer) has overall responsibility for providing adequate resources to support the protection of information systems and communication, consistent with <u>2-15-112</u>, <u>MCA. Duties and Powers of Department Heads</u>.
 - b. Information Security Officer The Information Security Officer (also known as the Information Systems Security Officer) may be the same individual designated by the department head to administer the Agency's security program for data under <u>2-15-114</u>, <u>MCA</u>. <u>Security Responsibilities of Departments for Data</u>. Specific responsibilities under this Standard are:
 - (i) evaluate Identification and Authentication controls within the Agency and all component organizations;
 - (ii) provide resolution recommendations to the department head and division administrators, if any; and
 - (iii) develop Agency policies, standards, and procedures as required.

B. Performance Requirements

Each Agency shall develop and implement **Identification and Authentication** security controls based on an evaluation of Information Systems, derived from the NIST *risk management framework,* which:

- **1.** uses the categorization standards of:
 - a. Federal Information Processing Standards Publication (FIPS PUB) 199
 Standards for Security Categorization of Federal Information and
 Information Systems
 - b. Federal Information Processing Standards Publication (FIPS PUB) 200

 Minimum Security Requirements for Federal Information and

 Information Systems
 - c. NIST SP800-60 Guide for Mapping Types of Information and Information Systems to Security Categories;

- **2.** uses guidance provided by:
 - a. Office of Management and Budget Memorandum E-Authentication
 Guidance for Federal Agencies (OMB 04-04) Attachment A E-Authentication Guidance for Federal Agencies:
 - (a) Assurance Levels and Risk Assessments
 - (b) E-Authentication Process
 - (c) Use of Anonymous Credentials
 - (d) Technology Requirements
 - b. NIST SP800-63 Revision 1 Electronic Authentication Guideline
 - c. <u>FIPS PUB 190 Guideline For The Use Of Advanced Authentication</u> Technology Alternatives
 - d. <u>FIPS PUB 201-1 Personal Identity Verification (PIV) of Federal Employees and Contractors;</u>
- 3. provides additional service: The Agency performs additional security-related functions as required by Identification and Authentication measures, including distributing security advisories, performing vulnerability assessments, and recommending security solutions consistent with common controls:
- **4.** implements specified levels of Identification and Authentication Standard(s) and controls based upon the following requirements:
 - as determined by completion of the risk management process specified in and based upon NIST SP800-39 Managing Information Security Risk

 Organization, Mission, and Information System View. After review of the risk assessment(s), Agency management shall determine any changes in the level of process, standards and controls. or,
 - b. implements the Low impact baseline control set defined within <u>NIST SP800-53 Recommended Security Controls for Federal Information Systems, Low-Impact Baseline Identification and Authentication family (Annex 1);</u>
- **5.** implements this Standard through procedure(s);
- **6.** reviews Identification and Authentication controls, processes and procedures as required, and implements authorized changes to policy, standard(s), or procedure(s); and

7. is based upon the latest publicly available versions of publications referenced within this Standard at the date of approval of this Standard. (Note: Because newer versions of the publications referenced herein become available from time-to-time, each Agency is encouraged to stay current by using the most recent versions, as deemed feasible by each Agency. Future revisions of this Standard must reference then currently-available versions.)

IV. Definitions

Agency: Any entity of the executive branch, excluding the university system. Reference 2-17-506(8), MCA.

Authentication: To verify the identity of a user, user device, or other entity, or the integrity of data stored, transmitted, or otherwise exposed to unauthorized modification in an IS, or to establish the validity of a transmission. Reference the National Information Assurance (IA) Glossary

Identification: Process an Information System (IS) uses to recognize an entity. Reference the National Information Assurance (IA) Glossary

Information Resources: Information and related resources, such as personnel, equipment, funds, and Information Technology. Reference <u>44 U.S.C. Sec. 3502</u>.

Information Security: The protection of information and Information Systems from unauthorized access, use, disclosure, disruption, modification, or destruction in order to provide confidentiality, integrity, and availability. Reference <u>44 U.S.C. Sec.</u> 3542.

Information System: A discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. Reference 44 U.S.C. Sec. 3502.

Information Technology: Hardware, software, and associated services and infrastructure used to store or transmit information in any form, including voice, video, and electronic data. Reference 2-17-506(7), MCA.

Refer to the <u>Statewide Information System Policies and Standards Glossary</u> for a list of local definitions.

Refer to the <u>National Information Assurance (IA) Glossary</u> for common Information systems security-related definitions.

Refer to the <u>National Institute of Standards and Technology Special Publication</u> 800-63 Revision 1 Electronic Authentication Guideline (NIST SP800-63), paragraph 4 for a list of identification and authentication-specific definitions.

VI. Changes and Exceptions

The <u>Procedure for Establishing and Implementing Statewide Information</u>
<u>Technology Policies and Standards</u> governs standards changes or exceptions.

Submit requests for a review or change to this instrument by <u>Action Request</u> form.

Submit requests for exceptions by an <u>Exception Request</u> form. Changes to policies and standards will be prioritized and acted upon based on impact and need.

VII. Closing

Direct questions or comments about this Standard to the State of Montana Chief Information Officer at SITSD Service Desk (at http://servicedesk.mt.gov/ess.do), or:

PO Box 200113 Helena, MT 59620-0113 (406) 444-2700 FAX: (406) 444-2701
